

## Quantifiers: Affirmative

### FORM

Quantifiers tell us the number or amount of something. Quantifiers that describe a number or amount that is sufficient are called affirmative quantifiers. Affirmative quantifiers can be used with affirmative statements, negative statements and questions. Some of the quantifiers go with count nouns, some go with non-count nouns and some go with both. They are listed below in order of decreasing number/amount.

#### Count Nouns

*all/any*  
*each/every*  
*almost all*  
*most*  
*many*  
*quite a few*  
*some/any*  
*several*  
*a few*

#### Non-Count Nouns

*all/any*  
  
*almost all*  
*most*  
*much*  
*quite a bit of*  
*some/any*  
  
*a little*

### EXAMPLES

Affirmative Statement: ***Some*** Canadians can speak both French and English.

Negative Statement: ***Some*** Canadians don't speak French.

Interrogative: Do ***some*** Canadians speak French?

*Complete the statements or questions below with an appropriate AFFIRMATIVE quantifier. More than one answer may be possible.*
